Tutorial 4 2026-2027

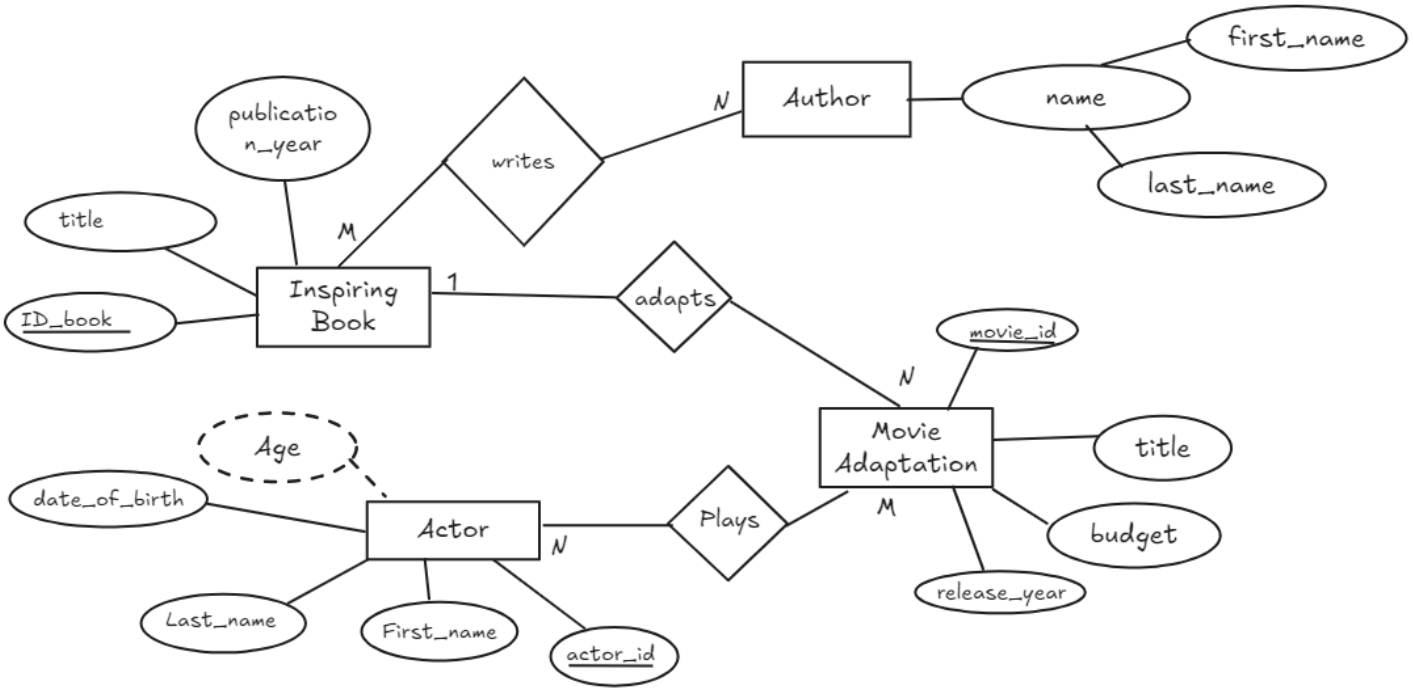

Exercise 1

- Given the ERD below describing the entity "**client**", give its corresponding representation in the Relational Model.

Exercise 2

- Given the ERD described below, deduce the corresponding **Relational Model**

Exercise 3

From the identified entities and relationship of the **exercise 4** of the **tutorial 3**

- generate the corresponding ERD of that database.
- generate its corresponding relational model

Exercise 4

Given the following un-normalized relation about **Project Assignments**:

Order(id_order, date_order, id_product, name_product, quantity_product, price_product, id_client, first_name_client, last_name_client, email_client)

1. Transform the relation into its **Third Normal Form (3NF)**.
